

WHAT IS CLAIMED IS:

1. A circular table, comprising a table board, and two opposite support units each foldably mounted on a bottom of the table board, wherein:

the bottom of the table board is formed with a receiving space; and

5 each of the two support units is mounted in the receiving space of the table board and includes a support stand pivotally mounted on one of two ends of the table board, and a support member pivotally mounted on a mediate of the table board and pivotally connected with the support stand.

2. The circular table in accordance with claim 1, wherein the receiving space of the table board has two opposite sides each provided with a support tube.

3. The circular table in accordance with claim 2, wherein the support tube is secured on the table board by a plurality of screws.

4. The circular table in accordance with claim 1, wherein the support stand of each of the two support units is provided with an auxiliary locking member, and the support member of each of the support units includes a support bar having a first end pivotally mounted on the mediate portion of the table board, and an extension bar having a first end pivotally mounted on a second end of the support bar and a second end pivotally mounted on the auxiliary locking member of the support stand.

5. The circular table in accordance with claim 4, wherein the support bar is substantially T-shaped.

6. The circular table in accordance with claim 4, wherein the extension bar is substantially V-shaped.

7. The circular table in accordance with claim 4, wherein the auxiliary locking member has a mediate portion formed with a substantially
5 C-shaped holder.

8. The circular table in accordance with claim 4, wherein the support member of each of the support units further includes two auxiliary support bars each mounted on the support bar.

9. The circular table in accordance with claim 8, wherein the two
10 auxiliary support bars are arranged on the support bar in a substantially V-shaped manner to support the support bar.

10. The circular table in accordance with claim 4, wherein the support bars of the two support units are juxtaposed to each other.

11. The circular table in accordance with claim 4, wherein the
15 support bars of the two support units are spaced from each other.

12. The circular table in accordance with claim 1, wherein the receiving space of the table board is formed with a plurality of receiving recesses for receiving the support stand and the support member of each of the support units when being folded.
